Final Project for SW Engineering Class CSC 648-848 Spring 2025

Section 02, Team 06
Application Name: NoName Search Engine (NNSE)
Team Lead Email: aausaf@mail.sfsu.edu

Name	Role
Anzara Ausaf	**Team Lead / Frontend Lead**
Harris Chan	**Git/Document/Instance Master**
Jiqing Liu	**Backend / Debugger / Backend Lead**
Nicolas Carrillo	**Database Engineer/ Backend**
Michael Ho	**Database Engineer / Document Organizer**
Chance Vodnoy	**Backend**
Casey Steven	**Backend**

URL: https://www.nonamesearchengine.com/
May 13, 2025

Delivery 2: Folder with complete project documentation – "M5 folder"

Please note that we use this final documentation for grading, both its content and format, as per the rubrics we published. Make sure no required section is missing.

It is the responsibility of the team lead to collect all required documents in one soft copy folder called M5 folder and it is the responsibility of all team members to help. This document/folder has to be ready just before your demo and it will be used for grading. PLEASE HAVE IT READY ON TIME! Please make sure your material is neatly arranged and well organized….

Note also that this folder with the corresponding documentation becomes your valuable portfolio that you should use in your job search.

The final M5 folder must have the following content and format (adherence to required content and format is graded, including cover page). Failure to follow exact format (including the title page and its placement) and content or missing some items will reduce the team grade.

1) Cover page containing:

- Title: "Final Project for SW Engineering Class CSC 648-848 Spring 2025"
- Team number,
- Name of your application (if any),
- Names of all members with the team lead first (with team lead's e-mail),
- URL of the demo
- Date

2) Product summary:

NoName Search Engine is a smart, flexible discovery platform designed to help users—especially college students—quickly find the best online tools and resources for every need. Whether you're looking for academic assistance, creative apps, mental-health support, or career development resources, NoName Search Engine combines powerful filters, multimedia previews, and community insights to surface exactly what you need, when you need it.

3) Milestone documents – M1-M4

M1, M2, M3 feedback summary report, M4 - all frozen versions after feedback was incorporated as specified before. You do not have to revise them based on changes after they were frozen. This way they are kind of "snapshots in time".

4) Product Screen Shots

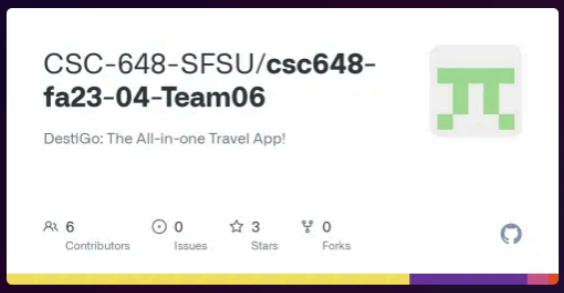
DestiGo: The All-in-one Travel App! Contribute to CSC-648-SFSU/csc648-fa23-04-Team06 development by creating an account on GitHub.



I just realized we need a pdf like this
within the milestone folder

Harris Chan https://github.com/CSC-648-SFSU/csc648-fa23-04-Team06/blob/master/Milestones/M0/CSC648-04-TEA...

Harris Chan 2/11/2025 1:54 PM
does anyone want to contribute to that?

Nico 2/11/2025 1:57 PM
maybe if u could start the file and then everyone just fills out their own section
1
i could try to fill out the stackk

Anzara Ausaf 2/25/2025 6:13 PM
I'll start working on number 4- initial list of functional requirements (edited)
you guys can check and alter or give me advice
after im done

Harris Chan 2/25/2025 6:14 PM
I can do the competitive analysis (edited)
which is 6

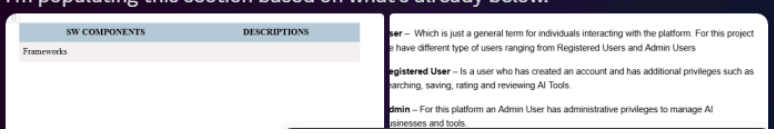
@Harris Chan which is 6

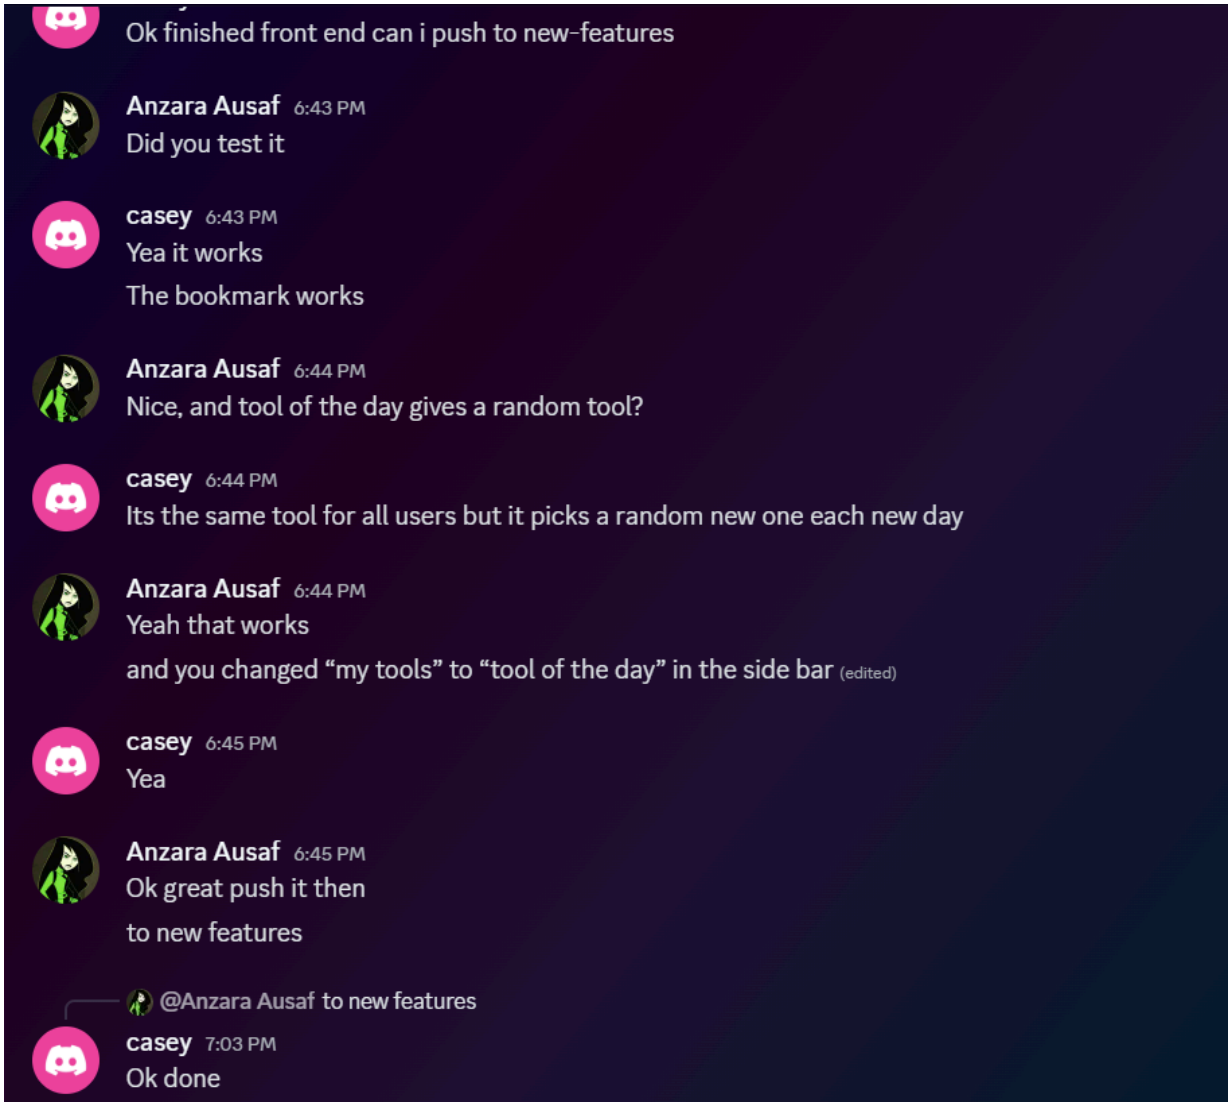
Michael Ho 2/25/2025 6:19 PM
I believe Jiqing said there was already a template table in our doc for you to work with for that part, just as a heads up so you don't end up doing extra work.
1

@Michael Ho I believe Jiqing said there was already a template table in our doc for you to work with for that part, just as a hea...

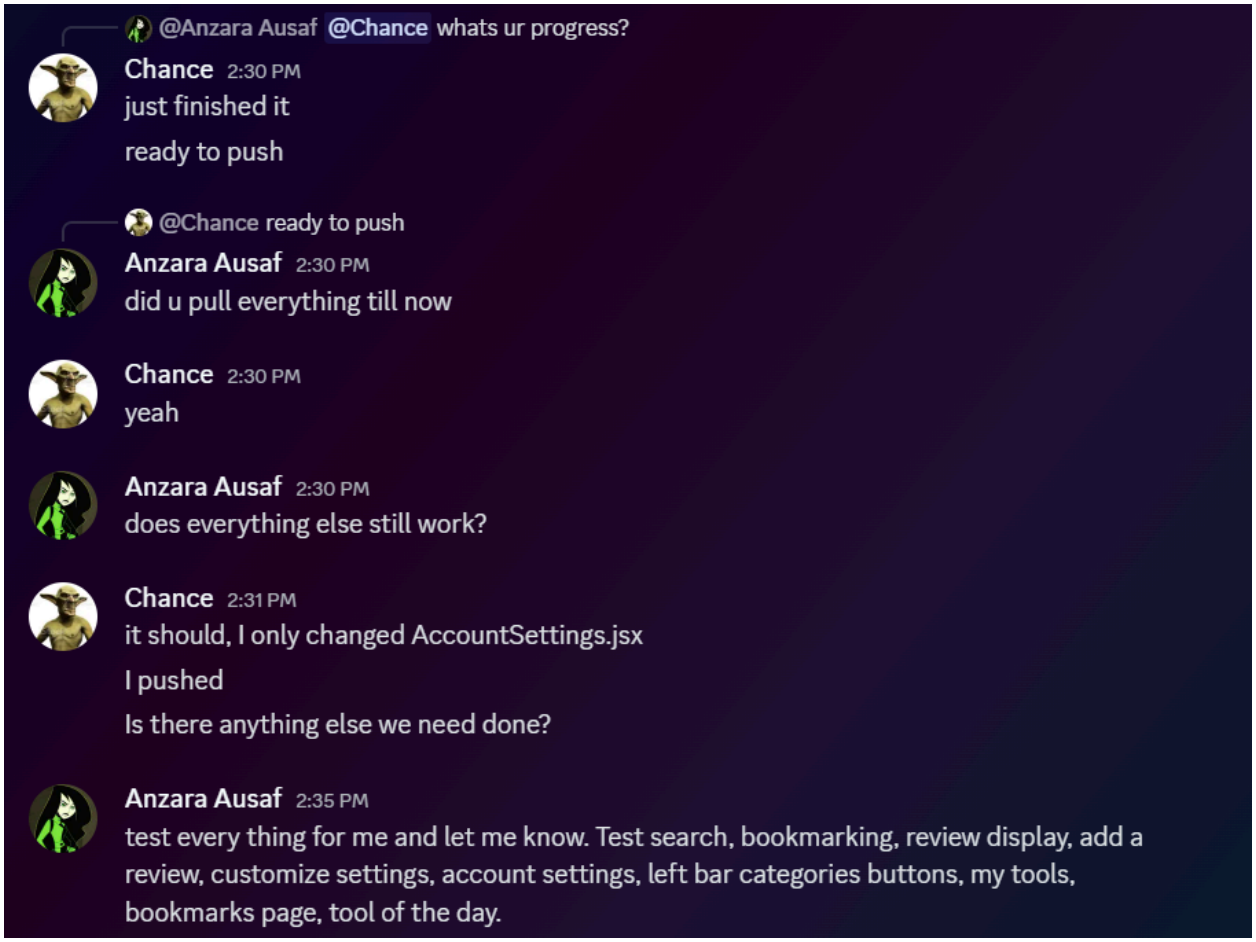
Harris Chan 2/25/2025 6:20 PM
yeah, I see that
thank you

JL 2/25/2025 6:21 PM
I'm populating this section based on what's already below.





Ok finished front end can i push to new-features
Anzara Ausaf 6:43 PM
Did you test it
casey 6:43 PM
Yea it works
The bookmark works
Anzara Ausaf 6:44 PM
Nice, and tool of the day gives a random tool?
casey 6:44 PM
Its the same tool for all users but it picks a random new one each new day
Anzara Ausaf 6:44 PM
Yeah that works
and you changed “my tools” to “tool of the day” in the side bar (edited)
casey 6:45 PM
Yea
Anzara Ausaf 6:45 PM
Ok great push it then
to new features
@Anzara Ausaf to new features
casey 7:03 PM
Ok done



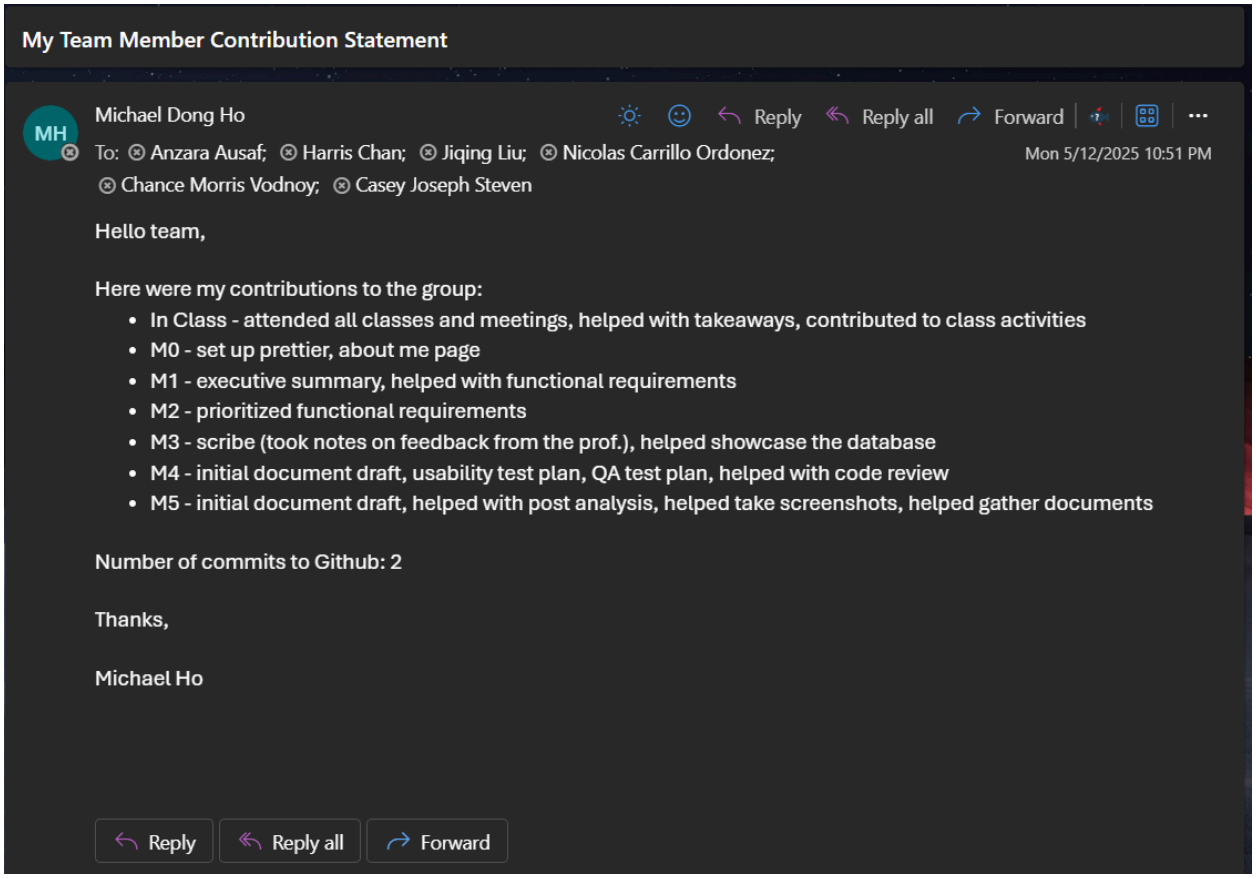
8) Team member contributions

This is a collection of e-mails that each team member sends to ALL of their respective team members (so that all team members can see all the mail on this) outlining:

- a) His/her contributions to team project and teamwork (technical and any other) in no more than half a page – point format is OK.
- b) Number of submissions he/she made to github team dev. branch

Length of e-mail is ¾ page max. This is kind of “peer review” – this makes sure you are comfortable with what you have done since all other team members will see it. Team leads and front-end leads: mention your role too and explain what you have done (be brief)

NOTE: You must submit copies of raw (original) e-mails sent from each team member to all other team members showing e-mail address lines (sender and recipients)



My Team Member Contribution Statement

Hello team,
Here were my contributions to the group:
In Class - attended all classes and meetings, helped with takeaways, contributed to class activities
M0 - set up prettier, about me page
M1 - executive summary, helped with functional requirements
M2 - prioritized functional requirements
M3 - scribe (took notes on feedback from the prof.), helped showcase the database
M4 - initial document draft, usability test plan, QA test plan, helped with code review
M5 - initial document draft, helped with post analysis, helped take screenshots, helped gather documents
Number of commits to Github: 2
Thanks,
Michael Ho

Hello team,

I hope everyone is well. I believe the following is a summary of my contributions to this project:

- In Class: Facilitated collaboration and task distribution, and assignment among the team.
- M0: Helped with finalizing the final software stack.
- M1: Brainstormed initial functional requirements + made sure of team collaboration
- M2: Created mockup UI for our product
- M3: Implemented the mockup UI + Implemented/Ensured many functionalities on frontend + made the UI more attractive after feedback
- M4: Peer code review + assisted in documentation + refined frontend functionalities such as "better search" + added more components/features such as bookmarking, display settings, Logout, etc.
- M5: Implemented AI chatbot (frontend) + last refined improvements to the frontend + Assigned tasks to team members
- Outside Class: Did my best to ensure smooth collaboration. Tried to individually communicate and reach out to every team member.

Number of commits to GitHub: Around 12 commits made on main/new-features

Hello team,
Here is a summary of my contribution to this project:

-Participation in daily sessions, group work time
-Participated in milestone edits and discussions
-Completed tasks assigned by the team leader
-Participated in project debugging
-Participated in backend API development

Submitted to GitHub: about 7 times on main/new-features

...

Thank you! | This is great, thank you! | Got it, thanks!

9) Post analysis – lessons learned (one-page max)

The biggest challenge faced by our team was inconsistent communication and varying levels of enthusiasm. Questions and issues were frequently met with extended periods of silence, which created difficulties, particularly for team members who weren't as confident with the project's languages and tools.

Role Assignment and Knowledge Distribution

Team members generally selected roles based on their confidence levels and interests, while others accepted positions to help when asked. More knowledgeable individuals became natural leads in their respective areas. The team operated under the assumption that everyone would

support each other's learning and development with the various technologies, but unfortunately, this collaborative learning environment didn't fully materialize.

This created situations where the more experienced members weren't available to provide assistance, and when other team members were present, they often lacked the knowledge needed to resolve issues effectively.

Proposed Improvements

1. Structured Meeting Schedule with Accountability

For future projects, implementing more strictly scheduled group meetings with a mandatory attendance policy would be beneficial. The team's highest productivity occurred during dedicated collaboration sessions at the end of class, though even then, attendance was inconsistent despite being required. Some team members didn't prioritize meetings and considered absences acceptable.

More consistent meetings with greater collective enthusiasm would have provided valuable opportunities for knowledge sharing, where team members could demonstrate and explain code changes. This would have fostered a more comprehensive understanding of the codebase across the team, potentially enabling everyone to contribute more effectively.

2. Enhanced Documentation Practices

More detailed code comments would have significantly improved collaboration. Comprehensive comments would have allowed team members to learn independently without requiring direct explanations from others. With multiple people working simultaneously on the project, code breakages were common, and thorough documentation would have streamlined the troubleshooting process.

By implementing these strategies, future collaborative projects can avoid similar challenges and create a more supportive, productive team environment.
